

LOCK ALARMTM

Lock it! Alarm it!

About Lock Alarm

The
'original'
lock with
alarm

Award
winning
design

Patented
"intelligent"
technology

No risk
of false
alarms*

In recent years security has become a very high profile issue. Theft is generally on the increase worldwide and demand for effective affordable security is extremely strong. The Lock Alarm products have been designed with this in mind and provide an intelligent security solution for a wide range of common applications at home, outdoors or when travelling.

*The problem with ordinary locks is they just silently wait for thieves to come along. **A Lock Alarm is different as it has an ear piercing alarm. Attempting to cut through the lock starts the alarm screaming, attracting attention and scaring away the potential thief.** According to Police and other law enforcement agencies noise is the best deterrent against crime.*

*Using award winning **patented** technology Lock Alarms are **the ONLY locks available which truly function by sounding the alarm when the cable/shackle is being cut.** "Intelligent" electronics ensure the alarm will only sound when an attempt is made to attack the device and therefore cause no false alarms.*

As a measure of their tremendous success, Lock Alarms have been promoted by some Police forces around the world as an effective deterrent against opportunistic theft (which accounts for over 98% of all thefts in most countries). In addition the Lock Alarm products have received many positive product reviews and testimonials from media and consumers.

** if used in accordance
with the manufacturer's instructions*

Cable Lock Alarm

Product Code: 6796 (2.4m / 8ft)
6797 (4.6m / 15ft)

**Alarm
screams
when cable
is cut**

*An innovative, portable device suitable for securing any large items from theft. When an attempt is made to cut through its ultra hard steel cable or attack the main lock unit a **120 decibel siren** starts screaming. The main lock unit can also be fixed to a wall, post, side of vehicle or directly onto bicycles or machinery using the brackets supplied.*

- *Flashing LED deterrent*
- *Available in 2.4m (8ft) and 4.6m (15ft) cable lengths*
- *Award winning patented technology to detect when the cable is being cut or the lock is being forced*
- *Cable is plastic coated to avoid scratching*
- *Cable stores neatly around lock unit when not in use*
- *Weatherproof*
- *Requires 1 x 9 volt battery (not included)*
- *Battery fits inside a tamper proof compartment*

Dimensions:

14 x 7.5 x 5 cm (5.5 x 3 x 2 in.)

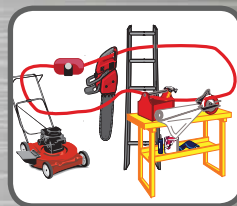

Weight:

6796 - 0.42kg (15oz)

6797 - 0.52kg (18oz)

Cable Diameter:

4mm (1/6 in.)

*Tamper proof brackets
and fixings included*

Lock Alarm XT

Product Code: 6795XT

**Alarm
screams
when cable
is cut**

With 2 x THICKNESS of cable of the regular Cable Lock Alarm (6796/6797) this portable device is suitable for securing any large valuable items from theft. When an attempt is made to cut through its ultra hard steel cable or attack the main lock unit a **120 decibel siren** starts screaming. The main lock unit can also be fixed to a wall, post, side of vehicle or directly onto bicycles or machinery using the brackets supplied.

- Flashing LED to warn off thieves
- 1.35m (4.5ft) length cable - 8mm (1/3") diameter
- Award winning **patented** technology to detect when the cable is being cut or the lock is forced
- Cable is plastic coated to avoid scratching
- Cable stores neatly around lock unit when not in use
- Weatherproof - indoor and outdoor use
- Requires 1 x 9 volt battery (not included)
- Battery fits inside a tamper proof compartment

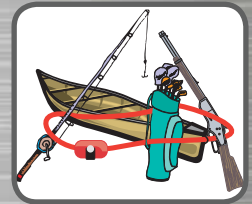

Dimensions:
14 x 7.5 x 5 cm (5.5 x 3 x 2 in.)
Weight: 0.42kg (15oz)

Cable Diameter:
8mm (1/3 in.)

Tamper proof brackets
and fixings included

CompuLock Alarm

Product Code: 1911

**Alarm
screams
when cable
is cut**

A specially adapted version of the Cable Lock Alarm (6796) suitable for securing desktop computers and computer peripherals from theft. Also ideal for protecting Audio/Visual systems, exhibition displays, office machines etc.

- **120 decibel siren** helps deter thieves and attract attention
- **Flashing LED**
- **2.4m (8ft) long cable**
- Award winning **patented** technology to detect when the cable is being cut or the lock is forced
- Cable is plastic coated to avoid scratching
- Cable fixing plates attach to equipment using the 'super weld bond' adhesive
- Brackets enable main lock unit to be mounted to a wall, floor or table
- Requires 1 x 9 volt battery (not included)
- Battery fits inside a tamper proof compartment

Dimensions:
14 x 7.5 x 5 cm (5.5 x 3 x 2 in.)
Weight: 0.42kg (15oz)

Cable Diameter:
4mm (1/6 in.)

Lock Alarm Mini

Product Code: 2770 / 2770CSA

**Alarm
screams
when cable
is cut**

A Retractable Cable Lock with Alarm suitable for securing your valuable items from theft. When an attempt is made to cut through the steel cable a **100 decibel siren** starts screaming. Using the computer slot adapter it can also be used to secure a laptop or notebook computer from theft.

- Steel cable extends up to 60cm (24") in length
- Cable is plastic coated to prevent scratches to possessions
- Cable retracts back into the main unit when not in use
- Flashing LED
- 3 digit 'programmable' combination lock
- Award winning patented technology
- Alarm sounds if the cable is cut
- A movement sensor can **also** be set so the alarm will sound if the lock is moved
- Secures a laptop computer using the computer slot adapter (included with model 2770CSA)
- Suitable for indoor and very occasional outdoor use
- Requires 4 x LR44/AG13 1.5volt batteries (included)
- Batteries fit inside a tamper proof compartment

Dimensions:
8.5 x 6 x 2.5 cm (3.5 x 2.5 x 1 in.)
Weight: 0.1kg (3.5oz)

Cable Diameter:
2mm (1/12 in.)

Heavy Duty Lock Alarm

Product Code: 1411 (0.7m / 28 in.)
1412 (1.2m / 48 in.)

**Alarm
screams
when cable
is cut**

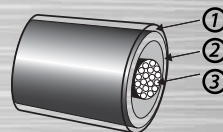

A 'Heavy Duty' Cable Lock with Alarm offering an extremely high level of security for bicycles, motorcycles, ATV's, garden machinery, construction equipment, trailers and boats etc. A **110 decibel alarm** sounds if the cable is cut or the lock unit is compromised.

- Ultra hard steel cable covered by armoured steel links and a protective vinyl sleeve
- Steel lock casing
- Flashing LED deterrent
- High security keys and lock cylinder
- Available in 0.7m (28") and 1.2m (48") cable lengths
- Award winning **patented** technology to detect when the cable is being cut or the lock is being forced
- Weatherproof
- Requires 2 x AAA 1.5 volt batteries (not included)
- Batteries fit inside a tamper proof compartment

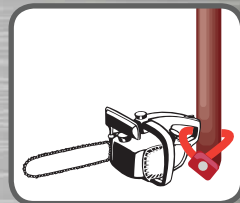

Weight:
1411 - 0.7kg (1.5 lbs)
1412 - 0.95kg (2.1 lbs)

Cable Diameter:
20mm (3/4 in.)

- ① Plastic vinyl
- ② Hardened steel link rings
- ③ Ultra hard steel cable

Lock Alarm Maxi

Product Code: 5944

**Alarm
screams
when cable
is cut**

*An easy to use Cable Lock with Alarm suitable for securing large valuable items from theft. A **110 decibel alarm** will sound if an attempt is made to cut through the ultra hard steel cable or the lock is forced. Ideal for bicycles, scooters, machinery etc.*

- Thick ultra hard steel cable with plastic outer coating - 1.5m (5ft) in length
- Flashing LED deters thieves
- High security keys and lock cylinder
- Utilises Lock Alarm's award winning **patented** technology to detect when the cable is being cut or the lock is being attacked
- Very quick and easy to use design
- Weatherproof
- Requires 2 x AAA 1.5 volt batteries (not included)
- Batteries fit inside a tamper proof compartment

Weight: 0.45kg (16oz)

Cable Diameter:
12mm (1/2 in)

Lock Alarm XL

Product Code: 6798 (10m / 30ft)
6799 (20m / 65ft)

**Alarm
screams
when cable
is cut**

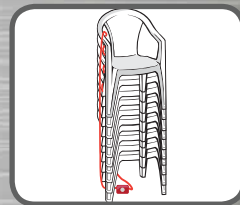

An extra long version of the Cable Lock Alarm (6796/6797) for when many items of equipment need to be secured. It is also ideal for securing display merchandise inside or outside retail stores. The cable simply passes through all the items and then locks into the main lock unit. Authorised key holders can remove items quickly and easily, however unauthorised attempts will start a **120 decibel siren** sounding.

Dimensions:
16.5 x 15 x 5 cm
(6.5 x 6 x 2 in.)
Weight:
6798 - 0.8kg (1.75 lbs)
6799 - 1.2kg (2.6 lbs)

Cable Diameter:
4mm (1/6 in.)

- Flashing LED shows lock is "alarmed"
- 10m (30ft) and 20m (65ft) cable lengths
- Cable is plastic coated to avoid scratches to equipment
- Award winning **patented** technology detects when cable is cut or lock is forced
- Lock unit can be attached to a wall, floor, rail or post using the tamper proof brackets
- Weatherproof - suitable for indoor and outdoor use
- Ideal for shops, rental yards, warehouses, cafes/restaurants etc.
- Requires 1 x 9 volt battery (not included)
- Battery fits inside a tamper proof compartment

PortaSafe

Product Code: 5676

**Alarm
screams
when safe
is tampered
with**

A portable alarmed safe ideal for securing laptop computers, cameras, cash, jewelry, important documents etc. in the home, office, vehicle or hotel room. The ultra hard steel cable quickly secures the safe to a fixed object to prevent removal. A **120 decibel alarm** sounds if an attempt is made to force open the safe or cut the steel anchorage cable.

- Flashing LED when safe is locked
- Unique **patented** construction, combining a tough and durable outer casing with a steel inner chassis to offer extremely high resistance to attack
- Incorporates award winning **patented** technology to detect when the cable is being cut or the safe door is forced open
- Foldaway handle for easy carrying
- Large enough to store a standard size laptop computer
- Suitable for indoor and outdoor use
- Requires 1 x 9 volt battery (not included)
- Battery fits inside an internal tamper proof compartment

Dimensions - External:
33 x 24 x 38 cm
(13 x 9.5 x 15 in.)

Dimensions - Internal:
28 x 20 x 32 cm
(11 x 8 x 12.5 in.)

Weight - empty:
2.7kg (5.9 lbs)

Cable Length:
1 metre (3ft 3in.)

Cable Diameter:
4mm (1/6 in.)

U-Shackle Lock Alarm

Product Code: 2503

**Alarm
screams
when lock
is cut**

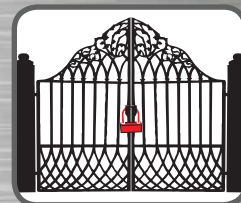

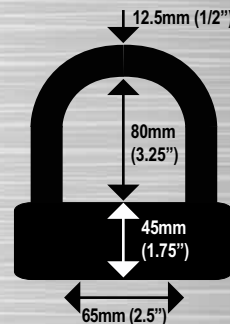

Versatile U lock with alarm for securing valuable items from theft. When an attempt is made to cut through the shackle a **100 decibel siren** starts screaming.

- **Hardened steel shackle** - 12.5mm (1/2") diameter
- **Rubber coating on the shackle** to prevent scratching to objects
- **Ultra hard zinc alloy lock casing**
- **High security keys and lock cylinder**
- **100 Decibel siren**
- **Award winning patented technology** to detect when the shackle is being cut or the lock is being violently attacked
- **Flashing LED** to help warn off thieves
- **Weatherproof**
- **Requires 2 x AAA 1.5 volt batteries** (not included)
- **Batteries fit inside a tamper proof compartment**

Dimensions:
10.5 x 14 x 2.5 cm
(4 x 5.5 x 1 in.)
Weight: 0.6kg (21oz)

Shackle Thickness:
12.5mm (1/2 in.)

Lock Alarm Disk

Product Code: 3110

**Alarm
screams
when lock
is moved**

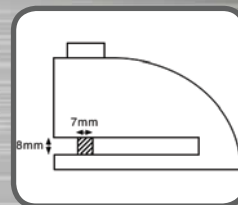

Disk lock with alarm for securing motorcycles and scooters from theft.

*Locks onto the disk brake and sounds an extremely loud **110 decibel alarm** if an attempt is made to steal the bike.*

- Ultra hard zinc lock casing
- Hardened steel disk lock pin - 7mm (1/4") diameter
- High security keys and lock cylinder
- 110 Decibel siren
- Dual sensors - movement and shock
- 'Intelligent' technology detects when the lock is under attack or the bike is being moved, and yet avoids false alarms from ambient conditions
- Can be used with or without alarm function
- Weatherproof
- Requires 6 x LR44/AG13 1.5 volt batteries (included)
- Batteries fit inside a tamper proof compartment

Dimensions:
9 x 6 x 3 cm
(3.5 x 2.5 x 1.25 in.)
Weight: 0.45kg (16oz)

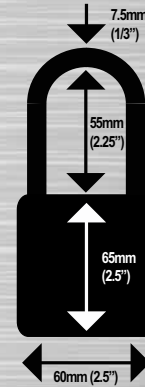

Lock Alarm Padlock

Product Code: 2104

**Alarm
screams
when lock
is cut**

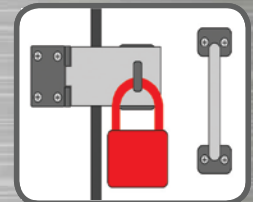

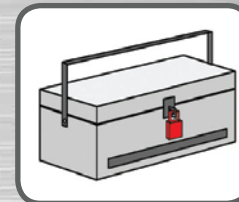

Compact sized padlock with alarm suitable for securing doors, gates, tool boxes etc. from entry. When an attempt is made to cut through the shackle or attack the main lock body a **110 decibel siren** starts screaming.

- Hardened stainless steel shackle - 7.5mm (1/3") diameter
- Ultra hard zinc alloy lock casing
- 110 Decibel siren
- Award winning **patented** technology to detect when the shackle is being cut or the padlock is being violently attacked
- High security keys and lock cylinder
- 1 x LED key and 2 x regular keys included
- Ice spray and anti-drill proof
- Weatherproof
- Requires 6 x LR54/AG10 1.5v batteries (included)
- Batteries fit inside a tamper proof compartment

Overall Dimensions:
6 x 13 x 2.5 cm (2.5 x 5 x 1 in.)
Weight: 0.38kg (14oz)

Shackle Thickness:
7.5mm (1/3 in.)

Lock Alarm HandiSafe

Product Code: 6111

**Alarm
screams
when cable
is cut**

A compact size portable alarmed safe. Ideal for securing iPad, tablet PC, iPhone, smartphone, camera, GPS navigation devices, jewelry, cash etc. The ultra hard steel cable quickly secures the safe to a fixed object such as a bed frame, vehicle seat, plumbing pipework, wall/floor hook etc. If an attempt is made to cut through the cable an **extremely loud alarm** will sound.

- Tough and durable outer casing
- Coded keys and lock cylinder
- 60cm (2ft) ultra hard steel cable enables safe to be locked to a fixed secure point to prevent unauthorised removal or opening
- Utilises award winning patented technology
- Flashing LED when safe is locked, provides deterrent to thieves
- Ideal for use in the home, office, school/university, car or hotel room
- Compact size means the safe can be secured under a bed or a vehicle seat
- Requires 1 x 9 volt battery (not included)
- Battery fits inside a tamper proof compartment

Cable Diameter:
4mm (1/6 in.)

Dimensions - External:
26.5 x 21 x 9 cm (10.5 x 8 x 3.5 in.)
Dimensions - Internal:
25 x 19 x 8 cm (10 x 7.5 x 3 in.)
Weight - empty: 1.3kg (2.9 lbs)

Suitable
for
iPad™

Lock Alarm Student Security Pack

Product Code: SSP3

The Lock Alarm Student Security Pack combines a Lock Alarm Mini (2770CSA) for laptop computer security with a Keychain Panic Alarm (KPA) for personal safety.

Lock Alarm Mini: A retractable cable lock with alarm suitable for securing a laptop computer from theft. When an attempt is made to cut through the steel cable a **100 Decibel siren** starts screaming.

Keychain Panic Alarm: A compact and stylish alarm on a handy keychain. Pressing both sides simultaneously starts an **ear piercing alarm** to dissuade any potential attacker and draw attention in a crisis.

- 2770CSA requires 4 x LR44/AG13 batteries (included)
- KPA requires 3 x LR44/AG13 batteries (included)
- Batteries fit inside a tamper proof compartment

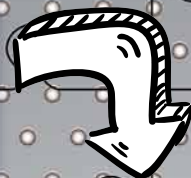

Dimensions:
2770CSA - 8.5 x 6 x 2.5 cm (3.5 x 2.5 x 1 in.)
KPA - 7.5 x 4 x 1.2 cm (3 x 1.5 x 0.5 in.)
Weight:
2770CSA - 0.1kg (3.5oz) KPA - 0.03kg (1oz)

Cable Diameter (2770CSA): 2mm (1/12 in.)

FAQ's

How much does the cable/shackle need to be cut before the alarm will sound?

The unique patented design of the cable/shackle is such that when the cable/shackle is cut through by 50% or more the alarm will activate.

How secure is a Lock Alarm?

No security device is totally infallible against a highly determined or professional thief. Opportunistic theft accounts for over 98% of all thefts in most countries around the world. A Lock Alarm will provide a significant deterrent factor against these opportunist thieves, as they usually choose easy and vulnerable targets, so any possessions secured by a Lock Alarm will often be ignored in favour of not so well secured items. Secondly, an opportunist thief will most likely run off at the first sound of any alarm. These are viewpoints consistently backed up by Police and security consultants around the world.

How long do the batteries last?

Battery life depends on several factors such as brand/quality of the batteries, frequency of product usage, environmental conditions etc. Assuming good quality alkaline batteries are used, typically with average usage and operating conditions they will last 6 – 12 months for the products which require a 9v or AAA batteries. For the products which operate on LR44 or LR54 batteries the life will be around 3-6 months for average usage.

Is there a key replacement service?

Yes, a replacement key service is available. For security reasons, replacement keys will only be issued to users who have retained proof of purchase and have previously registered their key code via our website, by email or by post at the time of purchase.

Are the Lock Alarms weatherproof?

Yes, all the Lock Alarms (except for items 2770/2770CSA and 6111) are suitable for use outdoors in all normal weather conditions. In very extreme weather conditions and/or extremely wet environments it is advisable to place the Lock Alarm device in a sheltered location or wrap a clear plastic bag around the main unit to protect it. This will help prolong battery life and give optimum reliability.

What about “false alarms”?

The patented cable/shackle design and “intelligent” electronics ensure the alarm will only sound when an attempt is made to (1) cut the cable/shackle, (2) force open the lock, or (3) violently attack the lock. For the 2770/2770CSA this applies when the movement sensor function is not being used.

FAQ's (continued)

Can you test the alarm and/or check the batteries are functioning?

On each Lock Alarm there is the function to test the alarm. Please refer to the individual product instructions for more details. In addition, on most of the Lock Alarms there is a LED that flashes when the device is locked. If this LED stops flashing or becomes very faint then this indicates the batteries need changing.

If the batteries are discharged will it affect the locking mechanism on the Lock Alarm?

No. The batteries only power the alarm function and do not affect the locking mechanism, which is totally mechanical – so the device will still lock and unlock even if the batteries become discharged.

What are the operating temperatures?

With good quality alkaline batteries fitted a Lock Alarm will operate between -20°C to 54°C (-4°F to 130°F). For more extreme conditions Lithium batteries should be used which will extend the operating range to -40°C to 60°C (-40°F to 140°F).

If the alarm starts how long will it continue to sound for?

If the alarm is sounding because the cable/shackle has been cut or the device has been forced open then the alarm will continue to sound until either the user turns it off by unlocking the device OR the batteries drain low (usually this is within 30-60 minutes). If the alarm however is sounding as a result of the shock sensor or the movement sensor (for those items which have this feature) then the alarm will only sound for approximately 30 seconds before it resets. In this situation, if the impact (shock) or movement is applied again to the device the alarm will sound for a further 30 seconds before resetting, and so on.

Is there a warranty provided with a Lock Alarm?

Yes, each Lock Alarm is warranted against defects in material and workmanship. At our option we will either repair or replace the device.

Have the Lock Alarms been tested by independent and recognised organisations?

Yes, all the Lock Alarms have been tested by world renowned independent testing organisations such as SGS and Intertek for conformity with the CE, RoHs and REACH directives.
